SUMMARY

Lead Frontend Engineer with **9.7 years** of experience building scalable, high-performance web applications using **React.js, TypeScript, and Micro-Frontend architectures (Module Federation)**. Proven track record of leading and mentoring frontend teams, driving performance optimization and cloud-native delivery across **financial services** and **e-commerce** domains.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), TypeScript, Redux Toolkit, Tailwind CSS, SASS/SCSS, HTML5, CSS3, Module Federation, Webpack, SSR, Progressive Web Apps (PWA)

Backend: Node.js, Express.js, RESTful API Development, GraphQL (Apollo Client), Java (API Integration), MongoDB, PostgreSQL

Cloud & DevOps: AWS (EC2, S3, IAM, ECS, EKS, SQS, SES), Docker, Kafka, CI/CD (Azure DevOps, GitHub Actions), Terraform

Testing: Jest, React Testing Library, Cypress, Unit Testing, Integration Testing

Security: Authentication & Authorization, OAuth 2.0, Data Encryption, Session Management

Monitoring: Sentry, Datadog, Apollo Studio, Core Web Vitals

Tools: Git, GitHub, Jenkins, GitHub Actions, GitHub Copilot, Webpack Bundle Analyzer

EXPERIENCE

SBER Bank

Senior Software Engineer

January 2025 – Present

Bengaluru, India

- Developed a secured cross-border Internet Banking application leveraging **Micro-Frontend architecture** in React.js/TypeScript, integrating **Financial APIs** for real-time data exchange, ensuring modularity, scalability, and compliance with RBI banking regulations.
- Led application performance transformation by implementing **service worker** caching and **CDN** strategies, reducing load time by **30%** monitored production stability using Performance Monitoring tools (Sentry/Datadog).
- Reduced frontend bundle size by **~59% (6.4 MB to 2.9 MB)** through Webpack optimizations, code-splitting, and Critical Rendering Path improvements, cutting initial load time from **~4s** to **~2s** in production.
- Designed and implemented secure **authentication & authorization** workflows aligned with industry banking security standards.
- Built reusable **Web Components** using a mobile-first approach, adhering to **WCAG 2.1 Accessibility Standards**, ensuring seamless responsive design across all screen sizes and achieving a **76% increase in Core Web Vitals** scores.
- Architected and implemented an **AI-powered Pull Request review system** using the organization's internal **AI/LLM model**, automatically flagging common code errors and recommending baseline performance optimizations prior to human review, **reducing average PR review turnaround time by 40%** and **saving developers approximately 2.5 hours per week/sprint** on manual first-pass reviews.

Publicis Sapient

Senior Associate Engineer

August 2021 – December 2024

London, UK / Bengaluru, India

- Led development of scalable, config-driven React.js applications using **Server-Side Rendering (SSR)** for the second-largest UK-based e-commerce client, serving **20M+ monthly active users**.
- Improved defect detection rate by **25%** by authoring comprehensive unit and integration test cases using Jest and React Testing Library, augmented by AI tools such as **GitHub Copilot**.
- Spearheaded transformation of the application into a **Progressive Web App (PWA)**, enabling offline capability, native-like experience, and full responsiveness across all device resolutions.
- Enhanced SEO and optimized performance via Webpack bundle analysis and Critical Rendering Path optimization, achieving a **42% increase in traffic** and **37% improvement in page load time**.

Josh Software Pvt. Ltd.

August 2020 – August 2021

Senior Engineer

Pune, India

- Designed and developed full-stack solutions using React.js and Node.js for a leading Indian food delivery startup, supporting **2M+ monthly transactions** and maintaining **99.9% uptime** during peak order hours.
- Implemented **Kafka**-based event streaming for real-time order updates and migrated backend services to **AWS** using Terraform scripts, enabling zero-downtime deployments and scaling to handle **300% traffic spikes** during promotional events.
- Built real-time driver tracking on maps using **WebSocket** and Pusher, processing **50,000+ location updates per minute** to continuously optimize delivery routes.

Mindtree Ltd.

January 2017 – August 2020

Senior Engineer

Bengaluru, India

- Developed a multi-tenant web application using React.js, Styled Components, and **GraphQL (Apollo Client)**, building reusable Web Components in adherence with **WCAG 2.1 Accessibility Standards**.
- Implemented **OAuth 2.0** authentication and authorization for secure, role-based user access control.
- Optimized performance via asynchronous operations, CDN caching, and database query optimization; tracked GraphQL query efficiency using **Apollo Studio** Performance Monitoring.

EDUCATION

Techno India College of Technology

Bachelor of Technology | DGPA: 7.94

August 2012 – August 2016

West Bengal University of Technology
